

For  
muzzle loader  
shooters the  
best only:

• *Billingshurst.*

*Finest  
quality  
percussion  
pistols*

Craftsman's art  
from the  
gunsmith's forge:

Worderlader-  
Waffenbau

Tilo  
Bedinski  
in  
Kulmbach

Due to their construction,  
the

*Billinghurst.*

systems, compared to  
side hammer locks, have

*persuasive  
advantages:*

central free-floating barrel

fastest ignition by shortest  
distance between cap and  
powder charge

exact ergonomic stock form

reliable function and longevity  
due to fewer parts subject to wear

extremely low line of sight

Standard design:

- .36 caliber barrel Suhl made, vacuum tension-free annealed
- equipped with a direct trigger system consisting of two functional parts (without or half cocked)
- Walnut stock
- barrel and hammer blued
- front sight adjustable for windage
- rear sight adjustable for elevation
- nipple with tungsten carbide insert
- grip size fitting the hand-width of the shooter

Technical data:

- length of barrel 230mm
- sight radius 287mm
- overall length approx. 397mm (according to grip size)
- weight approx. 1.050 g

Included accessories:

- punch to remove the conical pin
- nipple key
- manual with loading data

Additional charges for:

- .40 / .45 caliber
- grips made out of walnut wood
- individual grip size (trigger distance etc.)
- engravings and gold-inlays
- checkering
